

Checking Cluster and Node Logs

Relevant Documentation

- [Looking at Logs](#)

Lesson Reference

Log in to your K8s Control Plane node.

Check the logs for your K8s services:

```
sudo journalctl -u kubelet
```

List your system pods:

```
kubectl get pods -n kube-system
```

Look for the `kube-apiserver` Pod and take note of its full Pod name.

Check the logs for the Kube API Server:

```
kubectl logs -n kube-system <KUBE-APISERVER_POD_NAME>
```
